The Flâneur (RLE Social Theory) Jul 12 2021 Timely and original, this collection of essays from the leading figures in their fields throws new and valuable light on the significance and future of flânerie. The flâneur is usually identified as the ‘man of the crowd’ of Edgar Allen Poe and Charles Baudelaire, and as one of the heroes of Walter Benjamin’s Arcades Project. The flâneur’s activities of strolling and loitering are mentioned increasingly frequently in sociology, cultural studies and art history, but rarely is the debate developed further. The Flâneur is the first book to develop the debate beyond Baudelaire and Benjamin, and to push it in unexpected and exciting directions.

Fieldnotes on Ordinary Love May 10 2021 "“Wilson’s collection is romantic yet world-weary, bereaved yet fortified?a kindred reflection of the heart in the modern world.” ?Publishers Weekly Fieldnotes on Ordinary Love is a collection whose poems approach family, politics, and romance, often through the lens of space: the vagaries of a relationship full of wonder and coldness, separation and exploration. There is the sense of the speaker as a cartographer of familiar spaces, of land he has never left or relationships that have stayed with him for years, and always with the newness of an alien or stranger. Acutely attuned to the heritage of Greco-Roman myth, Wilson writes through characters such as the Basilisk and the Minotaur, emphasizing the intense loneliness these characters experience from their uniqueness. For the racially ambiguous speaker of these poems, who is both black and not black, who has lived between the American South and the Midwest, there are no easy answers. From the fields of Kentucky to the pigeon coops of Chicago, identities and locations blur—the pastoral bleeds into the Afrofuturist, black into white and back again."

Civil Society (RLE Social Theory) Jan 06 2021 This major study discusses some of the meanings and preconditions of freedom, responsibility and social order. The author argues that these are problems of modernity. The imagination of civil society created a milieu which was at once the location and defence of social self-sufficiency in the world. The book identifies the origins of civil society in the work of Locke, Hobbes, Rousseau and the often forgotten philosophers of the Scottish Enlightenment. It shows how the assumptions of civil society, and the state of nature, fed into the sociological and philosophical discourses which emerged in the nineteenth century. The book does not ask 'What is civil society?'; instead it asks 'Why is civil society?' The author concludes that through civil society, the protagonists and heirs of European modernity struggled to make their world meaningful and safe. Civil society involved the establishment of boundaries between the community of the social and the terrifying milieu of Nature.

Citizenship Apr 09 2021 This book presents a clear and comprehensive overview of citizenship, which has become one of the most important political ideas of our time. The author, an experienced textbook writer and teacher, uses a postmodern theory of citizenship to ask topical questions as: * Can citizenship exist without the nation-state? * What should the balance be between our rights and responsibilities? * Should we enjoy group as well as individual rights? * Is citizenship relevant

to our private as well as our public lives? * Have processes of globalisation rendered citizenship redundant?

Vocabulary Myths Nov 04 2020 In Vocabulary Myths, Keith S. Folse breaks down the teaching of second language vocabulary into eight commonly held myths. In debunking each myth, he introduces the myth with a story based on his 25 years of teaching experience (in the United States and abroad), continues with a presentation of what empirical research has shown on the

topic, and finishes with a list of what teachers can do in their classrooms to facilitate true vocabulary acquisition. The goal of Vocabulary Myths is to foster a paradigm shift that correctly views vocabulary as fundamental in any second language learning process and demonstrates that research supports this goal-that in fact there is a wealth of empirical evidence to support these views. In addition, an important theme is that teachers have overestimated how much vocabulary students really understand, and as a result, the so-called "comprehensible input" is neither comprehensible nor input. The second language vocabulary acquisition myths reexamined in this book are: *In learning another language, vocabulary is not as important as grammar or other areas. *Using word lists to learn L2 vocabulary is unproductive. *Presenting new vocabulary in semantic sets facilitates learning. *The use of translations to learn new vocabulary should be discouraged. *Guessing words from context is an excellent strategy for learning L2 vocabulary. *The best vocabulary learners make use of one or two really specific vocabulary learning strategies. *The best dictionary for L2 learners is a monolingual dictionary. *Teachers, textbooks, and curricula cover L2 vocabulary adequately.

Panic Jan 26 2020 Impending environmental catastrophe, threat of terrorism, viruses both biological and virtual, disease: there seem to be so many reasons to panic today. But what is panic and why does it happen? This book uses a range of literature from sociology, cultural studies and popular psychology to develop an original analysis of panic in contemporary social life. Bringing together academic literature from a range of disciplines, films, novels and current affairs, it encourages thought about why and how we panic – both individually and collectively. Keith Tester explores how cataclysmic events and smaller-scale episodes expose the fragility of our relationships, institutions and expectations. He shows how thinking about panic reveals key aspects of contemporary social, cultural and personal relationships. Panic is a highly readable and incisive

introduction to the subject for students, scholars and all those who want to know what panic means and why it is important.

Vacant Possession Mar 08 2021 Vacant possession is an element of property law that ensures a property is left in good condition when it changes hands. Every time a property is sold, or if tenants move out of rented property, vacant possession is unavoidable; a vital part of the job of any property lawyer or surveyor. Yet this is the first book to look at this area in depth. If a property professional understands vacant possession they can make sure their cases move quickly and complete at a time that suits them. If they do not, they are vulnerable to others who know it better and can use the law to frustrate proceedings for months or even years while their clients continue to pay money on rent or mortgage payments for properties they're not using. This book is essential reading for all property lawyers and surveyors. It is destined to be the definitive guide to vacant possession.

Causation in Educational Research Jul 20 2019 Calls to understand ‘what works’ in education are being made the world over. We need to know not only ‘what works’ but under what conditions, how and why. Causation is central to this.

Researchers, educationists, readers and users of research need to know the effects of causes and the causes of effects. This strongly practical book helps researchers and readers of research understand, plan and investigate causation in education. It guides readers through statistical matters, explaining them clearly and simply in words as well as numbers, and shows them how to investigate qualitative causal research in education. After introducing deterministic and probabilistic causation, the book shows how these can be researched in different ways. It explains: how to determine causes from effects and how to link theory and practice in causal research how to plan and conduct causal research in education how to analyze, present and interpret causal data, and the limits of causal understanding.

Containing worked examples from both qualitative and quantitative research, *Causation in Educational Research* provides a manual for practice, underpinned by a rigorous analysis of key issues from philosophy, sociology and psychology. It will appeal to new and established researchers, readers of educational research, social science students and academics.

Linguistic Meaning (RLE Linguistics A: General Linguistics)
Oct 03 2020 Dr Keith Allan presents a coherent, consistent and comprehensive account of linguistic meaning, centred around an informally presented theory of meaning. It is intended for graduate and undergraduate students of linguistics, or any linguist curious about what a theory of meaning should seek to accomplish and the way to achieve that aim. The work assumes that the primary task of a theory of linguistic meaning is to

describe the meaning of speech acts. This in turn presupposes a theory of semantics and a theory of prosodic meaning, as well as a proper treatment of the co-operative principle, context and background information. These matters are dealt with in detail. The second task of a theory of linguistic meaning is to identify what meaning is, to explain the relationships between sense and denotation, and to explicate the nature of meaningful properties and meaning relations. These matters are fully covered, and the work concludes with a summary of the principle arguments presented.

Teaching History for the Common Good May 30 2020 In Teaching History for the Common Good, Barton and Levstik present a clear overview of competing ideas among educators, historians, politicians, and the public about the nature and purpose of teaching history, and they evaluate these debates in light of current research on students' historical thinking. In many cases, disagreements about what should be taught to the nation's children and how it should be presented reflect fundamental differences that will not easily be resolved. A central premise of this book, though, is that systematic theory and research can play an important role in such debates by providing evidence of how students think, how their ideas interact with the information they encounter both in school and out, and how these ideas differ across contexts. Such evidence is needed as an alternative to the untested assumptions that plague so many discussions of history education. The authors review research on students' historical thinking and set it in the theoretical context of mediated action--an approach that calls attention to the concrete actions that people undertake, the human agents responsible for such actions, the cultural tools that aid and constrain them, their purposes, and their social contexts. They explain how this theory allows educators to address the breadth of practices, settings,

purposes, and tools that influence students' developing understanding of the past, as well as how it provides an alternative to the academic discipline of history as a way of making decisions about teaching and learning the subject in schools. Beyond simply describing the factors that influence students' thinking, Barton and Levstik evaluate their implications for historical understanding and civic engagement. They base these evaluations not on the disciplinary study of history, but on the purpose of social education--preparing students for participation in a pluralist democracy. Their ultimate concern is how history can help citizens engage in collaboration toward the common good. In *Teaching History for the Common Good*, Barton and Levstik: *discuss the contribution of theory and research, explain the theory of mediated action and how it guides their analysis, and describe research on children's (and adults') knowledge of and interest in history; *lay out a vision of pluralist, participatory democracy and its relationship to the humanistic study of history as a basis for evaluating the perspectives on the past that influence students' learning; *explore four principal "stances" toward history (identification, analysis, moral response, and exhibition), review research on the extent to which children and adolescents understand and accept each of these, and examine how the stances might contribute to--or detract from--participation in a pluralist democracy; *address six of the principal "tools" of history (narrative structure, stories of individual achievement and motivation, national narratives, inquiry, empathy as perspective-taking, and empathy as caring); and *review research and conventional wisdom on teachers' knowledge and practice, and argue that for teachers to embrace investigative, multi-perspectival approaches to history they need more than knowledge of content and pedagogy, they need a guiding

purpose that can be fulfilled only by these approaches--and preparation for participatory democracy provides such purpose. Teaching History for the Common Good is essential reading for history and social studies professionals, researchers, teacher educators, and students, as well as for policymakers, parents, and members of the general public who are interested in history education or in students' thinking and learning about the subject.

The study begins by placing the problem in its historical context and goes on to examine different regions of the Third World influenced by colonialism. It concludes with a contemporary global overview of current colonial dependency and provides a detailed and comprehensive bibliography on different facets of education and colonialism.

Why History? Sep 14 2021 The author aims to show, through a series of case studies of Derrida and others, that postmodern ways of thinking signal the end of history - 'history' especially
