The Working Class Sep 14 2021 In The Working Class: Poverty, education and alternative voices, Ian Gilbert unites educators from across the UK and further afield to call on all those working in schools to adopt a more enlightened and empathetic approach to supporting children in challenging circumstances. One of the most intractable problems in modern

education is how to close the widening gap in attainment between the haves and the have-nots. Unfortunately, successive governments both in the UK and abroad have gone about solving it the wrong way. Independent Thinking founder Ian Gilbert's increasing frustration with educational policies that favour 'no excuses' and 'compliance', and that ignore the broader issues of poverty and inequality, is

shared by many others across the sphere of education - and this widespread disaffection has led to the assembly of a diverse cast of teachers, school leaders, academics and poets who unite in this book to challenge the status quo. Their thought-provoking commentary, ideas and impassioned anecdotal insights are presented in the form of essays, think pieces and poems that draw together a wealth of

research on the issue and probe and discredit the current view on what is best for children from poorer socio-economic backgrounds. Exploring themes such as inclusion, aspiration, pedagogy and opportunity, the contributions collectively lift the veil of feigned 'equality of opportunity for all' to reveal the bigger picture of poverty and to articulate the hidden truth that there is always another way. This book is not about giving you all the answers, however. The contributors are not telling teachers or schools leaders how to run their schools, their classroom or their relationships - the field is too massive, too complex, too open to debate and to discussion to propose 'off-the-shelf' solutions. Furthermore, the research referred to in this book is not presented in order to tell educators what to think, but rather to inform their own thinking and to challenge some of the dominant narratives about educating the 'feckless poor'. This book is about helping educators to ask the right questions, and its starting question is quite simple: how can we approach the education of young people from disadvantaged backgrounds in a way that actually makes a difference for all concerned? Written for policy makers and activists as well as school leaders and educators, *The Working Class* is both a timely survey of the impact of current policies and an invaluable source of practical advice on what can be done to better support disadvantaged children

in the school system. Edited by Ian Gilbert with contributions from Nina Jackson, Tim Taylor, Dr Steven Watson, Rhythmical Mike, Dr Ceri Brown, Dr Brian Male, Julia Hancock, Paul Dix, Chris Kilkenny, Daryn Egan-Simon, Paul Bateson, Sarah Pavey, Dr Matthew McFall, Jamie Thrasivoulou, Hywel Roberts, Dr Kevin Ming, Leah Stewart, (Real) David Cameron, Sir Al Aynsley-Green, Shona Crichton, Floyd Woodrow, Jonathan Lear, Dr Debra Kidd, Will Ryan, Andrew Morrish, Phil Beadle, Jaz Ampaw-Farr, Darren Chetty, Sameena Choudry, Tait Coles, Professor Terry Wrigley, Brian Walton, Dave Whitaker, Gill Kelly, Roy Leighton, Jane Hewitt, Jarlath O'Brien, Crista Hazell, Louise Riley, Mark Creasy, Martin Illingworth, Ian Loynd, David Rogers, Professor Mick Waters and Professor Paul Clarke.

Everyday People Save the Planet and So Can You Dec 17 2021 *Everyday People Save the Planet and So Can You: A Qualitative Examination of Green Lifestyles in Lowcountry South Carolina* examines three interview studies, conducted over the last two decades, with green parents, choice utility bike commuters, and necessity utility bike commuters. This book draws on qualitative analyses of the data and literature (social practice, social innovation, embodiment, and attention economy research/theory) to ask and answer the question of how advocates and policy makers can enable pro-environmental behavior in people's everyday lives. Deborah McCarthy Auriffeille begins by focusing

on the particularities of living green in Lowcountry South Carolina, a region that is both highly conservative and conservationist. She then examines the pathways to, challenges of, and meanings/motivations that practitioners told about green living. Finally, she draws on analyses of respondents' narratives and interdisciplinary theory to make policy recommendations and suggestions for future social science research directions.

Literature Beyond the Human Mar 20 2022 How can Clarice Lispector's writings help us make sense of the Anthropocene? How does race intersect with the treatment of animals in the works of Joaquim Maria Machado de Assis? What can Indigenous philosopher and leader Ailton Krenak teach us about the relationship between environmental degradation and the production of knowledge? *Literature Beyond the Human* is the first collection of essays in English dedicated to an investigation of Brazilian literature from the viewpoint of the environmental humanities, animal studies, Anthropocene studies, and other critical and theoretical perspectives that question the centrality of the human. This volume includes 15 chapters by leading scholars covering two centuries of Brazilian literary production, from Gonçalves Dias to Astrid Cabral, from Euclides da Cunha to Davi Kopenawa, and others. By underscoring the vast theoretical potential of Brazilian literature and thought, from the influential

Modernist thesis of “cultural cannibalism” (antropofagia) to the renewed interest in Amerindian perspectivism in culture. Post-Anthropocentric Brazil shows how the theoretical strength of Brazilian thought can contribute to contemporary debates in the anglophone realm.

The Politics of Minimum Income Sep 26 2022 Minimum income schemes (MIS) have become key social protection institutions for European citizens, but we know little regarding the logic and dynamics of institutional change in this policy field. This book provides an analytical model that will facilitate an understanding of the scope and direction of recent reforms, offering insight into the conditions under which minimum income schemes are introduced, expanded or retrenched. Natili presents a

comparative analysis of policy trajectories of minimum income schemes in Italy and Spain between the mid-1980s and 2015. Although these two countries had similar points of departure, and faced comparable functional pressures and institutional constraints, they experienced remarkably different developments in this policy field in the last two decades. This comparative analysis provides empirical evidence of the impacts of different types of credit-claiming dynamics resulting from the interaction of socio-political demand with political supply. The Politics of Minimum Income also assesses the reform processes both in countries that have introduced MIS in the age of austerity (such as Portugal) and in countries that have retrenched them (Austria and Denmark). *DeLisa's Physical Medicine and Rehabilitation: Principles and Practice* Jan 26 2020 DeLisa's Physical Medicine and Rehabilitation, Principles and Practice presents the most comprehensive review of the state of the art, evidence-based clinical recommendations for psychiatric management of disorders affecting the brain, spinal cord, nerves, bones, joints, ligaments, muscles, and tendons.

500 e uno quiz di astronomia per imparare a divertirsi Mar 08 2021

Prefazione di Luigi Bignami Vorresti conoscere i nomi dei popoli che hanno influenzato l'astronomia occidentale moderna e quelli di grandi scienziati che hanno rivoluzionato il mondo con i

loro studi e le loro intuizioni? Ti piacerebbe sapere come è fatto il nostro Sistema solare e cosa c'è nell'Universo? Saresti curioso/a di imparare come si osserva il cielo stellato, apprendere i nomi delle principali stelle e costellazioni che lo popolano, e quali siano state alcune delle più importanti missioni che hanno portato gli esseri umani alla conquista dello spazio? Oppure pensi già di sapere tante di queste cose e vorresti semplicemente metterti alla prova? Qualunque sia la tua volontà, sei di fronte al libro giusto. Qui puoi fare tutto quello che hai letto poc'anzi, rispondendo ai quiz sui vari argomenti di astronomia contenuti all'interno, e confrontando le risposte con i risultati che troverai alla fine. Il tutto con il giusto spirito di gioco, anche risolvendo dei cruciverba a tema. Impara divertendoti!

Marginality in the Urban Center Jul 24 2022 This book examines the increasing marginalization of and response by people living in urban areas throughout the Western Hemisphere, and both the local and global implications of continued colonial racial hierarchies and the often-dire consequences they have for people perceived as different. However, in the aftermath of recent U.S. elections, whiteness also seems to embody strictures on religion, ethnicity, country of origin, and almost any other personal characteristic deemed suspect at the moment. For that reason, gender, race, and even class, collectively, may

not be sufficient units of analysis to study the marginalizing mechanisms of the urban center. The authors interrogate the social and institutional structures that facilitate the disenfranchisement or downward trajectory of groups, and their potential or subsequent lack of access to mainstream rewards. The book also seeks to highlight examples where marginalized groups have found ways to assert their equality. No recent texts have attempted to connect the mechanisms of marginality across geographical and political boundaries within the Western Hemisphere.

Come imparare a studiare

Oct 23 2019 «Studiare è un'attività impegnativa, che di solito riguarda chi ha un'età in cui mille interessi diversi dallo studio reclamano il loro posto nella giornata: è per questo che lo studio mette alla prova non solo l'intelligenza, ma anche molte altre facoltà come l'autocontrollo, la forza d'animo, la costanza, e coinvolge le cose in cui si crede, l'idea che ognuno ha del mondo e di quello che nel mondo ci sta a fare.

L'importanza dello studio, quindi, non sta solo nel risultato diretto (il voto, la promozione, un diploma...) ma pure nel fatto che studiando si costruiscono risorse utili anche quando la scuola sarà finita, come la capacità di agire sistematicamente, di organizzare, di pensare in modo strategico. Chi studia con metodo diventa capace, un po' alla volta, di prendere in mano

la propria vita. Questo libro è dedicato a chi non ha ancora trovato un metodo di studio, e soprattutto a chi finora non aveva nemmeno pensato che potesse esistere qualcosa che semplifica lo studio e lo rende più facile. Questo qualcosa esiste: è il metodo. Saperlo, significa avere già percorso metà della strada.»

Psychological Testing Apr 28 2020 Psychological Testing: A Practical Introduction 4e offers students of psychology and allied disciplines a comprehensive survey of psychometric principles and tests in the major categories of applied assessment. Coverage includes test norms, reliability, validity, and test development, with an entirely new chapter on test fairness and bias. Chapters on assessment of cognitive ability, achievement, personality, clinical instruments, and attitudes provide up-to-date examples of the widely used tests in each category. Recognizing that active engagement maximizes learning, the text presents as an active learning device rather than a reference work. Extensive use of chapter objectives, key point and end-of-chapter summaries, practice problems, applied scenarios, internet-based resources, and statistics skills review enable students to engage more fully with the material for a deeper understanding. Written in a clear, reader-friendly style, the text approaches challenging topics by balancing technical rigor with relatable examples of contemporary applications.

Metacognition and Successful Learning

Strategies in Higher Education Jul 20 2019

Metacognition plays an important role in numerous aspects of higher educational learning strategies. When properly integrated in the educational system, schools are better equipped to build more efficient and successful learning strategies for students in higher education.

Metacognition and Successful Learning Strategies in Higher Education is a detailed resource of scholarly perspectives that discusses current trends in learning assessments. Featuring extensive coverage on topics such as spiritual intelligence strategies, literacy development, and ubiquitous learning, this is an ideal reference source for academicians, graduate students, practitioners, and researchers who want to improve their learning strategies using metacognition studies.

Sbagliando non si impara Dec 25 2019 Se comprare o meno il biglietto del treno, se andare o meno a un concerto, se tenersi il proprio lavoro o lasciarlo per inseguire la propria passione. E ancora, per chi votare, se vaccinare o meno i propri figli, se perdonare o meno la persona amata. La nostra vita è composta dalle scelte che facciamo, scelte piccole o grandi, scelte che determinano chi siamo e orientano il nostro futuro. Scelte che, nella maggioranza dei casi, sono sbagliate. La nostra mente, infatti, ci inganna in continuazione, facendoci apparire del tutto razionali e

scontate decisioni basate su trappole, scorciatoie, bias cognitivi e pregiudizi: il nostro processo decisionale ci apparirà sempre semplice e lineare, quando invece scegliere tra due tipi di pasta al supermercato può essere complesso quanto mandare un astronauta in orbita. Sara Garofalo, psicologa e ricercatrice, invita il lettore a mettersi alla prova: ognuno dei capitoli di questo libro contiene test, indovinelli ed esercizi in cui si è chiamati a prendere delle decisioni apparentemente semplici e scontate, ma che in realtà mettono in luce i nostri errori e ci aiutano a capire come funziona il nostro cervello. Un libro che aiuta a imparare dagli errori e insegna ad azzeccare la prossima scelta.

Research Anthology on Implementing Sentiment Analysis Across Multiple Disciplines Aug 01 2020 The rise of internet and social media usage in the past couple of decades has presented a very useful tool for many different industries and fields to utilize. With much of the world's population writing their opinions on various products and services in public online forums, industries can collect this data through various computational tools and methods. These tools and methods, however, are still being perfected in both collection and implementation. Sentiment analysis can be used for many different industries and for many different purposes, which could better business performance and even society. The Research

Anthology on Implementing Sentiment Analysis Across Multiple Disciplines discusses the tools, methodologies, applications, and implementation of sentiment analysis across various disciplines and industries such as the pharmaceutical industry, government, and the tourism industry. It further presents emerging technologies and developments within the field of sentiment analysis and opinion mining. Covering topics such as electronic word of mouth (eWOM), public security, and user similarity, this major reference work is a comprehensive resource for computer scientists, IT professionals, AI scientists, business leaders and managers, marketers, advertising agencies, public administrators, government officials, university administrators, libraries, students and faculty of higher education, researchers, and academicians.

The History and Evolution of Tourism Feb 07 2021 This book provides an overview of the history and evolution of tourism to the present, and speculates on possible and probable change into the future. It discusses significant travel, tourism and hospitality events while referring to tourism-related notions and theories that have been developed since the beginnings of tourism. Its scope moves beyond a comprehensive historical account of facts and events. Instead, it bridges these with contemporary issues, challenges and concerns, hence enabling

readers to connect tourism past with the present and future. This textbook aspires to enhance readers' comprehension of the perplexed system of tourism, promoting decision-making and even the development of new theories. This book will be of great interest to academics, practitioners and students from a wide variety of disciplines, including tourism, hospitality, events, sociology, psychology, philosophy, history and human geography.

Converging Perspectives on Conceptual Change Jun 18 2019 Conceptual change, how conceptual understanding is transformed, has been investigated extensively since the 1970s. The field has now grown into a multifaceted, interdisciplinary effort with strands of research in cognitive and developmental psychology, education, educational psychology, and the learning sciences. *Converging Perspectives on Conceptual Change* brings together an extensive team of expert contributors from around the world, and offers a unique examination of how distinct lines of inquiry can complement each other and have converged over time. Amin and Levrini adopt a new approach to assembling the diverse research on conceptual change: the combination of short position pieces with extended synthesis chapters within each section, as well as an overall synthesis chapter at the end of the volume, provide a coherent and comprehensive perspective on conceptual change research. Arranged

over five parts, the book covers a number of topics including: the nature of concepts and conceptual change representation, language, and discourse in conceptual change modeling, explanation, and argumentation in conceptual change metacognition and epistemology in conceptual change identity and conceptual change. Throughout this wide-ranging volume, the editors present researchers and practitioners with a more internally consistent picture of conceptual change by exploring convergence and complementarity across perspectives. By mapping features of an emerging paradigm, they challenge newcomers and established scholars alike to embrace a more programmatic orientation towards conceptual change.

Curriculum Leadership Oct 03 2020 This text helps current and aspiring administrators, teachers, and curriculum directors successfully restructure, enhance, and implement school K-12 curriculum. Now in its Fifth Edition, this foundational book highlights 21st century educational ideas and advocacy, while also remaining focused on tried and true strategies for meeting state and national standards in today's diverse classrooms. Design Principles and

Methodologies Oct 27 2022 This book introduces readers to the core principles and methodologies of product development, and highlights the interactions between engineering design and industrial design. It shows to what extent the two cultures can be reconciled, and conversely what makes each of them unique. Although the semantic aspect is fundamental in industrial design, while the functional aspect is essential for the industrial product, the interaction between the two worlds is strategically vital. Design is also a strategic problem-solving process that drives innovation, builds business success and leads to better quality of life through innovative products, systems, services and experiences. The book connects product development with the concepts and strategies of innovation, recognizing that product design is a complex process in which invention, consumers' role, industrial technologies, economics and the social sciences converge. After presenting several examples of artifacts developed up to the conceptual phase or built as prototypes, the book provides a case study on a packaging machine, showcasing the principles that should underlie all design activities, and the methods that must be employed to successfully establish a design process. The book is primarily targeted at professionals in the industry, design engineers and industrial designers, as well as researchers and students in design schools, though it will

also benefit any reader interested in product design.

Forensic Psychology Nov 23 2019 This fascinating and research-led textbook gives students the facts and the tools they need to engage critically with the psychological dimension of the criminal justice system. Accessibly written and packed with the latest psychological research, *Forensic Psychology: Fact and Fiction* is an engaging and wide-ranging exploration of both foundational and contemporary issues. The book prepares students to weigh up evidence and arguments, and reach their own conclusions about the issues and questions that have led them to study forensic psychology. *Forensic Psychology: Fact and Fiction* gives students all they need to get to grips with debates about the link between mental fitness and criminal responsibility, the purposes and effectiveness of punishment, and the use of police force, and others. It places psychology at its heart, combining research with legal perspectives to give the full picture. Drawing on global research and examples, students are given insights into what differs and what remains the same across jurisdictions and borders. Real-life case studies illustrate forensic concepts, allowing students to see how psychology is applied to criminal behaviour and the response of society to it. This comprehensive introduction is ideal for undergraduate students taking a course in forensic psychology. Balancing clarity and rigor, the book takes the student on a journey

from the fundamental concepts through to the application of psychology to forensic techniques.

EMPATICI VS NARCISISTI Come imparare a gestire il dono dell'empatia e difendersi da narcisisti patologici Mar 28 2020

"Quello che si instaura tra un empatico ed un narcisista patologico è un legame tossico, in quanto, nella relazione (sia essa familiare, sentimentale, amicale) vengono a mancare quelli che sono gli ingredienti principali di un rapporto sano, ossia ascolto attivo e genuino, empatia, rispetto e reciprocità. Il narcisista non vede altri che sé stesso: pensieri e bisogni sono tutti autoriferiti.

L'empatico è colui che il narcisista sfrutta al solo scopo di ottenere riconoscimento e rifornimento. Possiamo pertanto immaginare il dolore della persona empatica che

entra in relazione con un soggetto di questo tipo e che, giorno dopo giorno, inizia a dubitare del suo valore e a credere che non sia meritevole d'amore. Leonardo Capocchia, Life Coach, con questo manuale vuole offrire agli empatici una guida che insegni, attraverso suggerimenti pratici, a proteggersi dai narcisisti patologici e imparare a gestire il dono dell'empatia affinché rappresenti una preziosa risorsa e non una condanna"

Food and Women in Italian Literature, Culture and Society

May 10 2021 This book explores how women's relationship with food has been represented in Italian literature, cinema, scientific writings and other forms of cultural expression from the 19th century to the present.

Italian women have often been portrayed cooking and serving meals to others, while denying themselves the pleasure of the table. The collection presents a comprehensive understanding of the symbolic meanings associated with food and of the way these intersect with Italian women's socio-cultural history and the feminist movement.

From case studies on Sophia Loren and Elena Ferrante, to analyses of cookbooks by Italian chefs, each chapter examines the unique contribution Italian culture has made to perceiving and portraying women in a specific relation to food, addressing issues of gender, identity and politics of the body.

Teacher Education and the

Development of Democratic Citizenship in Europe Aug 13

2021 This book uses international collaboration between nine European countries to explore how teacher education systems across Europe perceive and act upon devolving democracy and democratic citizenship.

Understanding these countries' cultural approaches to individual and national priorities in education is essential in perceiving similarities and differences in the meaning of 'democracy'.

The book offers debate on the prospects for teacher education and the development of democratic citizenship in Europe based on historical, political, economic and cultural contexts and the Council of Europe's (CoE) competences for democratic citizenship.

With critical analysis and evaluation around the common theme of teacher education and its role in developing democratic citizenship, the book provides awareness and understanding of how teacher education responds to the Council of Europe's (CoE) conceptual model of competences for democratic culture.

20 competences categorized as Values, Attitudes, Skills, and Knowledge and Critical Understanding are defined so they can be taught to enable learners to practice them in their daily lives as democratic citizens. This book will be of key interest to academics, researchers and post-graduate students in the fields of teacher education, educational policy and politics, and citizenship

education.

Bringing together terminology, analytical perspectives, and methodological advances, this second edition facilitates informed decision-making while connecting the latest thinking in these methodological areas with actual practice in higher education. This research handbook provides higher education administrators, student affairs personnel,

institutional researchers, and faculty with an integrated volume of theory, method, and application.

Environmental Alteration Leads to Human Disease Aug 25 2022

This book aims to explore the impact of human alterations of Earth's ecological systems on human health. Human activities are producing fundamental biophysical changes faster than ever before in the history of our species, which are accompanied by dangerous health effects. Drawing on advanced ecological principles, the book demonstrates the importance of using systemic medicine to study the effects of ecological alterations on human health. Planetary Health is an interdisciplinary field, but first of all it must be systemic and it needs a preferential relationship between Ecology and Medicine. This relation is to be upgrading, because today both ecology and medicine pursue few systemic characters and few correct interrelations. We need to refer to new principles and methods sustained by the most advanced fields, as Landscape Bionomics and Systemic Medicine. Thus, we will be able to better discover environmental syndromes and their consequences on human health. Environmental transformations proposed by PHA (from biodiversity shifts to climate change) do not consider bionomic dysfunctions which can menace human health. On the contrary, finding advanced diagnostic criteria in landscape syndromes can strongly help to find the effects

on human well-being. The passage from sick care to health care can't avoid the mentioned upgrading.

"Grazie per l'amicizia" Jun 30 2020

Una lente d'ingrandimento sulla società e sui social, uno spaccato di satira e di attualità sviscerato dal diario di un'utente istrionica e divertita, sarcastica e mai banale. Il vademecum di quello che siamo diventati e di quello che dobbiamo evitare di diventare Alessia Di Nitto aka Lanè, nasce maldestramente, a S. Silvestro del 1979, palesando a tutti e nell'immediato, la voglia di rompere le scatole. Imprenditrice, fitness coach e writer, vive a Gaeta e ama lo

sport, i viaggi, i libri, la famiglia, gli amici veri e le tavolate sincere. Nel rapporto con il social ha solo trovato un pubblico più ampio per la sua vena di sarcasmo e intrattenimento, dove ha dato libero sfogo ad un'ironia tagliente ed una fruibile introspezione.

Imparare Nov 04 2020 Il nostro cervello ha, fin dalla nascita, un talento che nemmeno i migliori software di intelligenza artificiale riescono ancora a imitare: la capacità di imparare. Persino il cervello di un bambino impara più velocemente e in modo più approfondito del più potente dei computer in circolazione oggi. Negli ultimi trent'anni sono stati fatti passi importanti nella comprensione dei principi fondamentali della plasticità cerebrale e dell'apprendimento. È tempo che adulti e bambini prendano coscienza del potenziale enorme del proprio cervello, così come, ovviamente, dei suoi limiti. Il funzionamento della memoria, il ruolo dell'attenzione, l'importanza del sonno sono scoperte ricche di conseguenze per ciascuno di noi. Delle idee molto semplici sul gioco, il piacere, la curiosità, la socializzazione, la concentrazione o il sonno possono aumentare ancora quello che è già il più grande talento del nostro cervello: imparare!

Thinking, Childhood, and Time

Oct 15 2021 Thinking, Childhood, and Time:

Contemporary Perspectives on the Politics of Education is an interdisciplinary exploration of the notion of childhood and its

place in a philosophical education. Contributors consider children's experiences of time, space, embodiment, and thinking. By acknowledging Hannah Arendt's notion that every child brings a new beginning into the world, they address the question of how educators can be more responsive to the Otherness that childhood offers, while assuming that most educational models follow either a chronological model of child development or view children as human beings that are lacking. The contributors explore childhood as a philosophical concept in children, adults, and even beyond human beings—Childhood as a (forgotten) dimension of the world. Contributors also argue that a pedagogy that does not aim for an "exodus of childhood," but rather responds to the arrival of a new human being responsibly (dialogically), fosters a deeper appreciation of the newness that children bring in order to sensitize us for our own Childhood as adults as well and allow us to welcome other forms of childhood in the world. As a whole, this book argues that the experience of natality, such as the beginning of life, is not chronologically determined, but rather can occur more than once in a human life and beyond. Scholars of philosophy, education, psychology, and childhood studies will find this book particularly useful.

Global Perspectives on Home Education in the 21st Century Jun 11 2021 Home education is the fastest growing educational movement in the world, yet the

research remains limited on why and how it has become so popular. As more and more families seek to homeschool, it is imperative that further studies are undertaken to understand how students' lives are impacted, as well as the challenges and opportunities that arise from this method of schooling. *Global Perspectives on Home Education in the 21st Century* is an edited collection that focuses on the major factors behind the global rise of the home education movement and explores many of the current issues faced in relation to homeschooling. The book examines key themes that include parents' and children's experiences of home education, how and why families choose to home educate, and what happens to home educated children once they are finished. Including topics such as unschooling, self-directed learning, willed learning, and holistic education, this book is primarily intended for home educators, school administrators, policymakers, researchers, academicians, and students.

Wounded Shepherd Nov 16 2021 Following his critically acclaimed *The Great Reformer*, Austen Ivereigh's colorful, clear-eyed portrait of Pope Francis takes us inside the Vatican's urgent debate over the future of the church in *Wounded Shepherd*. This deeply contextual biography

centers on the tensions generated by the pope's attempt to turn the Church away from power and tradition and outwards to engage humanity with God's mercy. Through battles with corrupt bankers and worldly cardinals, in turbulent meetings and on global trips, history's first Latin-American pope has attempted to reshape the Church to evangelize the contemporary age. At the same time, he has stirred other leaders' deep-seated fear that the Church is capitulating to modernity—leaders who have challenged his bid to create a more welcoming, attentive institution. Facing rebellions over his allowing sacraments for the divorced and his attempt to create a more "ecological" Catholicism, as well as a firestorm of criticism for the Church's record on sexual abuse, Francis emerges as a leader of remarkable vision and skill with a relentless spiritual focus—a leader who is at peace in the turmoil surrounding him. With entertaining anecdotes, insider accounts, and expert analysis, Ivereigh's journey through the key episodes of Francis's reform in Rome and the wider Church brings into sharp focus the frustrations and fury, as well as the joys and successes, of one of the most remarkable pontificates of the contemporary age.
