E-Commerce and Web Technologies Feb 25 2020 We welcome you to the proceedings of the 5th International Conference on E- Commerce and Web Technology (EC-Web2004) held in conjunction with DEXA 2004 in Zaragoza, Spain. This conference, first held in Greenwich, United Kingdom in 2000, now is in its 5th year and very well established. As in the four previous years, it served as a forum to bring together researchers from academia and commercial developers from industry to discuss the current state of the art in e-commerce and Web technology. Inspirations and new ideas emerged from intensive discussions during formal sessions and social events. Keynote addresses, research presentations and discussions during the conference helped to further develop the exchange of ideas among the researchers, developers and practitioners present. The conference attracted 103 paper submissions and almost every paper was reviewed by three program committee members. The program committee selected 37 papers for presentation and publication, a task which was not easy due to the high quality of the submitted papers. We would like to express our thanks to our colleagues who helped with putting together the technical program: the program committee members and external reviewers for their timely and rigorous reviews of the papers, and the organizing committee for their help in the administrative work and support. We owe special thanks to Gabriela Wagner, Mirella Köster, and Birgit Hauer for their helping hands concerning the administrative and organizational tasks of this conference. Finally, we would like to thank all the authors who submitted papers, authors who presented papers, and the participants who together made this conference an intellectually stimulating event through their active contributions.

Veterinary Hematology - E-Book May 22 2022 Combining essential hematology content with the diagnostic features of an atlas, *Veterinary Hematology: A Diagnostic Guide and Color Atlas* delivers all the information you need to accurately assess and diagnose the blood diseases of common domestic animals — including dogs, cats, horses, cattle, sheep, goats, pigs, and llamas. This all-in-one resource utilizes a clinically-oriented and user-friendly approach to guide you through the processes of selecting relevant diagnostic tests, collecting and preparing samples, interpreting sample results, and determining their clinical significance. High-resolution photomicrographs, full-color illustrations, and excellent schematic drawings, tables, and quick-reference algorithms help you clearly visualize these concepts and procedures. Two books in one gives you the information of a user-friendly, clinical textbook and the diagnostic features of a color atlas in a single reference. Practical, clinically-relevant text is comprehensive and yet concise in its delivery of vital information such as: Principles and procedures that are employed in recognizing normal, abnormal, and artifactual features of blood and bone marrow samples and developing accurate diagnoses Common cytochemical stains and summary charts for interpretation Sample collection, staining procedures, and diagnostic techniques Differentiating features of malignant and benign hematologic disorders Miscellaneous cells and blood parasites and their significance in the evaluation of blood smears Hematopoietic and non-hematopoietic neoplasms High-resolution photomicrographs and excellent schematic drawings, tables, boxes and quick-reference algorithms aid your understanding of basic clinical concepts and differential diagnostic considerations. Over 800 full-color illustrations help you clearly visualize the concepts and clinical features of the blood and bone marrow — from normal cell maturation to the development of various pathologies.

Chinese Martial Arts Training Manuals Aug 21 2019 Chinese martial arts masters of the past created special training manuals with text and images—sometimes appearing in the illustrations themselves—and these manuals now provide an invaluable glimpse back in time that allow readers to see how various martial arts were practiced. Covering the Ming Dynasty, the Qing Dynasty, and the Republican Period, this in-depth survey presents 30 masters and their books, placing them in the context of Chinese culture and history. Along with biographical portraits of these masters, the book covers the history of the manuals, Chinese martial arts historians, the history of Taiwanese martial arts, how Chinese martial artists made their livings, the Imperial military exams, the place of the Shaolin Temple in Chinese martial arts history, and much more. Illustrated with hundreds of photographs and drawings from the manuals themselves, the book offers a multifaceted portrait of Chinese martial arts and their place in Chinese culture.
